Final Office Action

Claims 1, 4, 7, 9, 12-15, 20-22, 26, 29-32, 35-38, 41, 43-51 are pending. Amendments are entered.

Summary of this Office Action June 22, 2009

1. Double Patenting Rejection
2. Response to Remarks
3. Conclusion
4. Communication

Double Patenting Rejection

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. 1, 3, 4, 7, 9, 12-15, rejected on the ground of nonstatutory double patenting over claim 18 of U. S. Patent No. 7,126,017 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

Art Unit: 1612

The subject matter claimed in the instant application is fully disclosed in the patent and is covered by the patent since the patent and the application are claiming common subject matter, as follows: The compound t-butyrate ester retinoyl t-butyrate is an elected species and has been disclosed in lines 45-50 in column 18 of US '017. This is a double patenting rejection. Specific compound has been disclosed in claim 9 and 14 of the present application. A method for reducing the toxicity has been claimed using the same compound disclosed in claim 18 of US '017.

DCR-942545

CN.S 9-(1,3-Dimethyl-cyclohex-2-enyl)-3,7-dimethyl-nona-2,4,6,8-tetraenoic acid 2-hydroxy-1,1,2-trimethyl-propyl ester

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Response to Remarks

New oath has been received. A new terminal disclaimer is required as is required by the authorities who approve the disclaimers. Terminal disclaimer has been filed on 3/31/08 has been not been approved.

Examiner will withdraw the rejection when TD will be approved by the office. DP rejection is now maintained.

Allowable subject matter

Claims 1, 4, 7, 9, 12-15, 20-22, 26, 29-32, 35-38, 41, 43-51 are not taught by the prior art. These are not allowed because double patenting rejection is still maintained. However, closest prior art is TSUTSUMI, YOICHI reference (abstract of JP9185159, IDS reference). Instant claims differ from the reference in three ways. First the side chain is attached to a different position of retinoic acid ring; second double bond is at different positions of the ring; third, one extra methyl group at the retinoid ring. The reference and prior art of record does not teach nor suggest such retinoic acid derivative as has been presently claimed.

CONCLUSION

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1612

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
